Encyclopedia of Pharmaceutical Science and Technology, Fourth Edition, Six Volume Set

Edited by James Swarbrick

This encyclopedia details pharmaceutical science best practices for equipment used, processes for manufacturing, options for packaging, and routes for drug delivery, and a thorough understanding of the choices behind each method. The regulations, safety aspects, patent guidance, and methods of analysis are also given, making this a must-have reference guide for all laboratories and libraries in the field. The Fourth Edition offers 29 new chapters ranging from biomarkers, computational chemistry, and contamination control to high-throughput screening, orally disintegrating tablets, and quality by design.

HB: 978-1-84184-819-8 | July 2013 | £1800.00 | £1440.00

Encyclopedia of Wireless and Mobile Communications, Second Edition - Three Volume Set

Edited by Borko Furht

The second edition of a bestseller, this book provides a substantial overview of more than 40 new entries on essential topics in the wireless communications field, from acoustic communications and data compression to optical fibers and wireless sensor networks. The first edition filled a need for a comprehensive yet concise resource made important information easily accessible. Keeping pace with the continually evolving field of telecommunications, this second edition is poised to do the same. Written by leading worldwide experts, this complete reference offers a broad range of both fundamental and advanced issues in telecommunications.

HB: 978-1-4665-0956-6 | Dec 2012 | £1995.00 | £1596.00

Encyclopedia of Environmental Science and Engineering, Sixth Edition (Print Version)

Edited by Edward N. Ziegler

Revised and updated, this sixth edition of a bestseller spans the entire spectrum of environmental science and engineering. Still the most comprehensive, authoritative reference available in this field, the monumental two-volume encyclopedia now includes 89 entries on topics ranging from acid rain, air pollution, and community health to environmental law, instrumentation, modeling, alternative energy, radioactive waste, and water treatment. Featuring expert contributors, this reference provides a view of the field that helps readers understand, manage, and respond to threats to the human environment.

HB: 978-1-4398-0442-1 | June 2012 | £578.00 | £462.40

Encyclopedia of Medical Physics

Edited by Slavik Tabakov, Franco Milano, Sven-Erik Strand, Cornelius Lewis & Perry Sprawls

Co-published by the EMITEL consortium and supported by the IOMP, this all-encompassing reference contains nearly 2,800 cross-referenced entries relating to medical physics and associated technologies. Featuring over 100 contributors who are specialists in their respective areas, the encyclopaedia describes new and existing methods and equipment in medical physics. It covers x-ray diagnostic radiology, MRI, nuclear medicine, radiation protection, radiotherapy, and ultrasound imaging. Most articles include references, further reading, images, graphs, formulas, and examples.

HB: 978-1-4398-4652-0 | Dec 2012 | £481.00 | £384.80

Encyclopedia of Environmental Management, Four Volume Set

Edited by Sven Erik Jorgensen

An indispensable resource, this encyclopedia examines the entire spectrum of tools available for environmental management. Easily accessible, it guides environmental managers to find the best possible solution to the myriad pollution problems they face. This four-volume set also examines how to address the specific pollution problems as part of a holistic, integrated environmental strategy. With nearly 400 in-depth entries and a topical table of contents, it defines pollution problems and their sources, discusses how to assess these problems, and proposes solutions using environmental, eco-, and clean technology, and environmental legislation.

HB: 978-1-4398-2927-1 | Dec 2012 | £1806.00 | £1444.80

Encyclopedia of Supply Chain Management - Two Volume Set (Print)

Edited by James B. Ayers

With contributions from experts in the field, this comprehensive encyclopedia contains approximately 300 accessible entries on a range of cutting-edge topics that span the entire area of supply chain management. The book offers a broad, clear overview of both fundamental topics and recent advances. It covers drivers of supply chain change, project management approaches for supply chain change, globalization and supply chains, the design of supply chains, and the Lean and Six Sigma movements.

Encyclopedia of Software Engineering Two-Volume Set

Phillip A. Laplante

The two volumes of the Encyclopedia of Software Engineering cover the multidisciplinary scope of this important field. More than 200 expert contributors and reviewers from industry and academia provide easy-to-read entries that cover software requirements, design, construction, testing, maintenance, configuration management, quality control, and software engineering management tools and methods.

HB: 978-1-4200-5977-9 | Nov 2010 | £562.00 | £449.60

Encyclopedia of Dietary Supplements, Second Edition

Paul M. Coates, Joseph M. Betz, Marc R. Blackman, Gordon M. Cragg, Mark Levine, Joel Moss & Jeffrey D. White

Encyclopedia of Dietary Supplements presents peer-reviewed, objective entries that rigorously examine the most significant scientific research on basic chemical, preclinical, and clinical data. Designed for healthcare professionals, researchers, and health-conscious consumers.

HB: 978-1-4398-1928-9 | Feb 2013 | £540.00 | £432.00

Encyclopedia of Chromatography, Third Edition

Edited by Jack Cazes

Thoroughly revised and expanded, this third edition offers illustrative tables and figures to clarify technical points in the articles and provides a valuable, reader-friendly reference for all those who employ chromatographic methods for analysis of complex mixtures of substances.

HB: 978-1-4200-8459-7 | Oct 2009 | £506.00 | £404.80

Encyclopedia of Alternative Investments

Edited by Greg N. Gregoriou

A pioneering reference essential in any financial library, this encyclopedia is the most authoritative source on alternative investments for students, researchers, and practitioners in this area. Containing 545 entries, the encyclopedia focuses on hedge funds, managed futures, commodities, and venture capital. It features contributions from well-known, respected academics and professionals from around the world.

HB: 978-1-4200-6488-9 | Aug 2008 | £194.00 | £155.20

Encyclopedia of Agricultural, Food, and Biological Engineering, Second Edition - 2 Volume Set

Edited by Dennis R. Heldman & Carmen I. Moraru

With nearly 2000 photographs, tables, equations, and figures — including 128 color figures — the book emphasizes and illustrates the various engineering processes associated with the production of materials with agricultural origin. Featuring more than 200 entries and 3600 references, this is the largest and most comprehensive guide on raw production technology.

HB: 978-1-4398-1111-5 | Oct 2010 | £596.00 | £476.80

Encyclopedia of Biopharmaceutical Statistics Third Edition

Edited by Shein-Chung Chow

Widely used by pharmaceutical scientists, clinical researchers, and biostatisticians, the third edition of this definitive reference includes 89 new chapters, bringing the total number of chapters to 230. It provides updated information on changes in regulatory requirements for drug review/approval processes and reflects recent developments in statistical design and methodology.

HB: 978-1-4398-2245-6 | Feb 2013 | £540.00 | £432.00

The CRC Encyclopedia of Mathematics, Third Edition 3 Volume Set

Eric W. Weisstein

This third edition of a bestseller is now presented as a three-volume set, making it much more accessible and easier to use when searching for information. Keeping the format that made its predecessors so popular, this edition has been extensively expanded, revised, and updated. It now contains nearly 12,000 entries.

HB: 978-1-4200-7221-1 | May 2009 | £331.00 | £264.80

Encyclopedia of Biomaterials and Biomedical Engineering Second Edition - Four Volume Set

Edited by Gary E. Wnek & Gary L. Bowlin

Written by more than 400 subject experts representing diverse academic and applied domains, this multidisciplinary resource surveys the vanguard of biomaterials and biomedical engineering technologies utilizing biomaterials that lead to quality-of-life improvements.

HB: 978-1-4200-7802-2 | May 2008 | £900.00 | £720.00
