

Elsevier Health Sciences

PREVIEW

OCTOBER & NOVEMBER 2015

ELSEVIER

Dear Bookseller

October is an exciting month at Elsevier as we publish the 41st edition of our super-seller ***Gray's Anatomy*** (page 2, International Edition also available)! Promoting excellence in anatomy for over 150 years, it remains the definitive comprehensive clinical reference, offering ready access to essential information to ensure safe, effective practice. We have some printed sample chapters in the office, so please contact Lucy on lavery.1@elsevier.com if you'd like some to spread the word to your customers and let them have a sneak preview at the beautiful imagery. If you're a UK customer look out for details coming soon about our exciting launch event in central London where the original illustrations will be on display!

In October & November we also have the new edition of ***McRae's Orthopaedic Trauma and Emergency Fracture Management*** (page 5, International Edition also available) as well as the authoritative source on every aspect of thoracic and cardiac surgery, ***Sabiston and Spencer Surgery of the Chest*** (page 8) and a first edition in our Amirsys range ***Diagnostic Pathology: Molecular Oncology*** (page 10). We also have 2 key new editions in our Dentistry range: ***Handbook of Orthodontics*** (page 20) and ***Contemporary Fixed Prosthodontics*** (page 21).

Turn to the centre pages for our **Medical Reference Promotion** exclusively for Preview readers. Please order via Customer Services with the code **BAF7** to get an extra 5% discount on these featured titles. Offer ends 15th August 2015. On our inside back cover page you'll find information about our new Key Title Alerts emails and the Bestseller Lists being uploaded to VirtualE to help you create better range promotions to accompany our Key Titles. If you're not a VirtualE subscriber you can sign up today with the link provided. If you'd like to add people in your business to your VirtualE account to make sure they get these alerts go to the Your Profile tab in VirtualE and click Add New Users.

We hope the first half of the year has gone well for you. Don't forget you can always contact your Elsevier account manager or Lucy in the office if you have any bespoke promotional requests.

Yours sincerely,

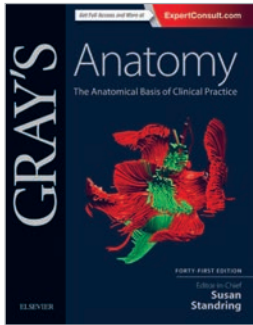

The Elsevier Trade Team

Gray's Anatomy, 41e

The Anatomical Basis of Clinical Practice

By **Susan Standring**, PhD, DSc, King's College London, UK

This 41st edition has been meticulously revised and updated throughout, reflecting the very latest understanding of clinical anatomy from field leaders around the world. The book's traditional lavish art programme and clear text have been further honed and enhanced, while major advances in imaging techniques and the new insights they bring are fully captured in new state-of-the-art X-ray, CT, MR and ultrasonic images.

FEATURES

- Regional organisation collects all relevant material on each body area together in one place
- Anatomical information is matched with key clinical information where relevant
- Numerous clinical discussions emphasise considerations that may affect medical care

NEW FEATURES

- More than 1,000 completely new photographs
- The downloadable eBook via Expert Consult now includes additional text, tables, illustrations, labelled imaging and videos as well as 24 specially invited 'Commentaries' on new and emerging topics related to anatomy

Also includes
 online access as well as

Medical Genetics, 5e

By **Lynn B. Jorde**, PhD, University of Utah Health Sciences Center, USA,

John C. Carey, MD, MPH, University of Utah Health Sciences Center, USA,

Michael J. Bamshad, MD, University of Utah Health Sciences Center, USA

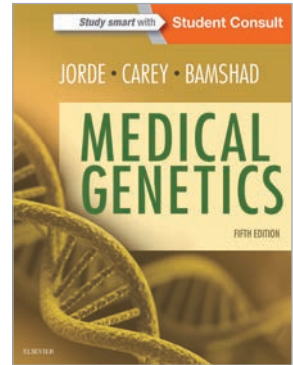

Providing state-of-the-art coverage of clinically relevant molecular genetics this new edition integrates recent developments with clinical practice, emphasising the central principles of genetics and their clinical applications. The accompanying Evolve site provides additional faculty notes, higher resolution images, 150 multiple choice questions and 100 sample problems and essay questions.

FEATURES

- Mini-summaries, study questions, suggested reading and a detailed glossary
- Demonstrates clinical relevance through over 230 photographs, illustrations and tables, along with boxes containing patient/family vignettes

NEW FEATURES

- New chapter on genomics and personalised medicine
- The latest knowledge and research on gene identification, cancer genetics, gene testing and gene therapy, common disorders, ethical and social issues

Dermatology Secrets Plus, 5e

By **James E. Fitzpatrick, MD**, Professor, University of Colorado Health Sciences Center, USA,

Joseph G. Morelli, MD, University of Colorado School of Medicine, USA

Now in vibrant colour throughout, this dependable review and reference retains its engaging question-and-answer format, ideally suited for board preparation, recertification exams, or quick clinical reference. More than 500 colour images and a new, larger page size provide the visual detail necessary to understand and diagnose skin disorders.

FEATURES

- 'Top 100 Secrets' chapter and key points boxes provide a fast overview of the topic
- Mnemonics, lists, quick-reference tables and an informal tone sets this review book apart from the rest

NEW FEATURES

- Entirely new section on neurocutaneous melanocytosis
- 8 new tables and more than 90 new figures
- Thorough updates to both text and references in all chapters and web resources have been added to the bibliography

McRae's Orthopaedic Trauma and Emergency Fracture Management, 3e

By **Timothy O White**, BMedSci, MBChB, FRCS(Tr &Orth), MD, University of Edinburgh, UK,
Samuel P Mackenzie, BMed Sci, MBChB, MRCS,
Royal Infirmary of Edinburgh, UK,
Alasdair J Gray, MBChB, FRCS, FCEM, MD,
University of Edinburgh, UK

Derived from Ronald McRae's *Pocketbook of Orthopaedics and Fractures* (978 0 443 10272 1), this new edition retains the underlying principles of the original editions with a comprehensive rewrite and re-presentation providing complete coverage of orthopaedic trauma surgery as relevant to contemporary practice.

FEATURES

- A detailed descriptive and didactic style, alongside a wealth of illustrations all completely redrawn for this book
- Comprehensive overview of both surgical as well as conservative management of orthopaedic trauma injuries

NEW FEATURES

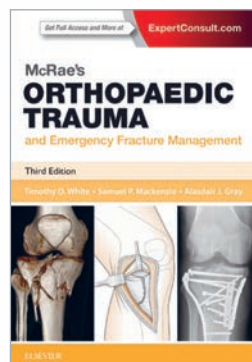

- Fully rewritten text based on a classic textbook by Mr Ronald McRae
- Now in a larger page size the book contains over 500 illustrations all drawn in two colours
- Over 250 x-rays accompany the text, many of which are connected with the line drawings

LATE ADDITION

Pediatric Allergy: Principles and Practice, 3e

By **Donald Y. M. Leung**, MD, PhD, University of Colorado Health Sciences Center, USA,

Hugh Sampson and **Stanley J. Szefer**, MD, University of Colorado Health Sciences Center, Denver, USA

Providing comprehensive, authoritative guidance on the day-to-day diagnosis and management of pediatric allergic and immunologic diseases with the latest research. Using an easily accessible full-colour format it highlights new chapters, extensive updates and clinically focused coverage.

FEATURES

- Includes diagnostic tests available for asthma and upper respiratory allergy
- Coverage of drug allergies and cross-reactivity
- Discusses the best approaches to care and treatment
- Appendices listing common food allergies and autoantibodies in autoimmune diseases

NEW FEATURES

- Revised asthma section examines and the most current knowledge on emerging asthma within young children
- New information on gene therapy, stem-cell therapy and a host of new immunodeficiency diseases
- New chapters on immunopathology, diagnostics and management, potential immunotherapeutic strategies for treating food allergies, current status of immunotherapy for food allergy and biologic therapies

Computer-Guided Applications for Dental Implants, Bone Grafting, and Reconstructive Surgery (adapted translation)

By Marco Rinaldi,
Scott D Ganz,
Angelo Mottola

Written by recognised dental implant surgery experts Marco Rinaldi, Scott Ganz and Angelo Mottola, this new text begins with the basic principles of guided dental implants including anatomical obstacles, pathologies and pharmacological management of patients and then uses a templated atlas format to discuss clinical case studies. With a companion website that includes videos demonstrating surgical procedures, this text makes it easier for the entire surgical team to share in the diagnosis and treatment planning for patients receiving implants.

ORTHODONTICS

Contemporary Fixed Prosthodontics, 5e

By **Stephen F. Rosenstiel**, BDS, MSD, The Ohio State University College of Dentistry, USA,

Martin F. Land, DDS, MSD, Southern Illinois University, USA,

Junhei Fujimoto, DDS, MSD, DDSc, Tokyo Medical and Dental University, Japan

This text provides a strong foundation in basic science, followed by practical step-by-step clinical applications. Procedures are presented in an organised, systematic format, and are illustrated by over 3,000 clear, high-quality drawings and photographs, now in full-colour.

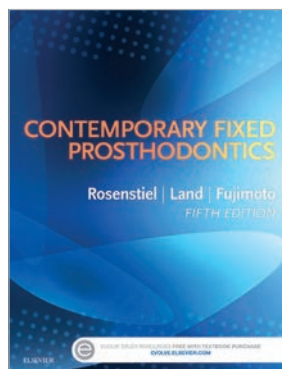

FEATURES

- Follows ADEA curriculum guidelines for fixed prosthodontics
- Features hundreds of step-by-step procedures
- Valuable appendices on dental materials/equipment and manufacturers
- 15 contributors collaborate with the editors to present up-to-date information and state-of-the-art techniques in prosthodontics

NEW FEATURES

- Classification System for Partial Edentulism
- New and re-shot step-by-step illustrations
- Updates in Implant-Supported Fixed Prosthesis, expanded section on dental aesthetics and expanded information on resin luting agents

Occupational Therapy with Aging Adults

Promoting Quality of Life through Collaborative Practice

By **Karen Barney**, PhD, OTR/L, FAOTA, Chair, Saint Louis University, USA,

Margaret Perkinson, PhD, Saint Louis University, USA

Occupational Therapy with Aging Adults is a brand new text written by OT experts Karen Frank Barney and Margaret Perkinson that takes a unique interdisciplinary and collaborative approach in covering every aspect of geriatric occupational therapy practice. Readers will explore the entire continuum of care for the aging population along with special considerations for this rapidly growing demographic.

FEATURES

- Unique inter- and intradisciplinary approach to intervention
- Case examples and a chapter on evidence-based practice
- Chapters on ethics, vision changes among the aging patient population and oral health

MARKET: Occupational Therapy students and practitioners, Physical Therapy students and practitioners, Geriatric Nurse Practitioners

Hand and Upper Extremity Rehabilitation, 4e A Practical Guide

By **Rebecca Saunders**, PT, CHT, Union Memorial Hospital,
Baltimore, USA,

Susan L. Burke, OTR/L, CHT, MBA, Union Memorial
Hospital, Baltimore, USA,

James Higgins, MD, Union Memorial Hospital, Baltimore, USA,

Michael A. McClinton, MD, Union Memorial Hospital,
Baltimore, USA,

Romina Astifidis, MS, PT, CHT

This practical resource blends the technical and clinical skills and knowledge of hand surgery and hand therapy for the treatment of common medical conditions affecting the upper extremity. Written in an outline format, it covers non-surgical and surgical procedures for these conditions, along with their purpose and rationale.

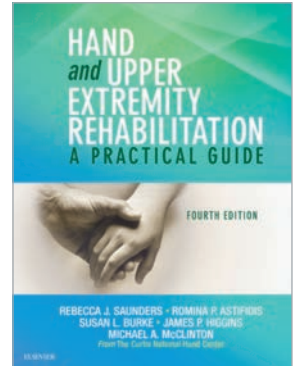

FEATURES

- Each chapter is written by a hand therapist and the operative content within each chapter is contributed by a hand surgeon
- The editorial board consists of three hand therapists and two hand surgeons

NEW FEATURES

- The most current information for effective practice
- New chapters give expanded coverage of the wrist, elbow, and shoulder
- Over 100 new line drawings and clinical photographs
- 49 contributors from hand centres around the United States, as well as those from the highly regarded Curtis National Hand Centre
- Clinical outcomes now included in each chapter

Virtual Clinical Excursions Online and Print Workbook for Maternity and Women's Health Care, 11e

By **Deitra Leonard Lowdermilk**, RNC, PhD, FAAN,
University of North Carolina at Chapel Hill, USA

Virtual Clinical Excursions is an online program that guides the student through a virtual hospital where the patients are real and their conditions are constantly changing. By immersing them in a realistic yet safe nursing environment it simulates the average clinical rotation by allowing users to conduct a complete assessment of a patient and set priorities for care, collect information, analyse and interpret data, prepare and administer medications and reach conclusions about complex problems.

Public Health Mini-Guides: Diabetes

By **Josie Evans**, University of Stirling, Scotland, UK
Angela Scriven, BA(Hons), MEd, CertEd, FRSPH, MIUHPE,
 Brunel University, London, UK

Diabetes is a worldwide public health concern and is being referred to as the ‘global epidemic of diabetes’, the ‘silent epidemic’ and the ‘diabetes timebomb’. The increasing incidence of diabetes, the heavy burden of morbidity and mortality associated with diabetes and its spiralling healthcare costs, underpin the importance of a public health approach to the prevention and management of diabetes. This Mini-Guide explores in more detail how public health practice might address some of these issues.
